PORTLAND, SATURDAY, NOV 27 1986 THE EASTERN QUESTION

The appropriement made in our dispatches restorday that Prince Nicholas of Mingrelu, rhom Russa designated as her cand date for the throne of Bulgaria, has been approved by all the powers of Europe, save England, is a complete triumph for Russia. Prince Nichalas is 33 years old, a colonel and aide-de-camp of the am years old, a colonel and aide-de-camp of the em perce of Russia, and was married in 1874 to Princess Marle, daughter of Alexander Adler berg, general and minister of the imperial court honor of the empress The Mingrellan prince as mere tool of the exar, the son-in law of a **Eussian court minister, he is himself a Russian** army officer and subject, and a member of the Greek thurch, who twenty years ago sold his sownedge rights in his principality for about \$500,000, and is merely a prince in name. This means the death of Bulgarian independence for, her own for any warlike purposes whenever she choises to occupy them in pursuance of her purpose to possess Constantincple In other words Eurile, by her practical absorption of Buigaria and the annihilation of her autonomy guaran-teed by the treaty of Ber in, gets all she contemfield, who superseded the treaty of San Stefano

the Great, Russia has gradually extended her domain to the Caspian, to the Crimea, to the months of the Dambe, to the Balkans and be posts; and she has done this not alone by enor-mous expenditure of blood and treasure, but by most satute diplomacy. Rassia helped Turkey resist Napoleon in Egypt, because she knewthat if Bousparte succeeded, France, not Russia, would capture Constantinople, and Russia again in 1807 declined Bousparte's proposition to wife out Turkey, because the great Constantinople. nopie, the Enxine and the Dardanpres of that power and the destruction of Turkish fleet at Nevarino in 1827 by the fleet of the silied powers under the English admirst Costington. another step forward on the road to Constanti mople. The time was when England's word might have stood against all Europe to half Europe, but the day has gone, never to return. Bussla wants a free southern sea board, but so long as the Turkish cannon command the par row channel of the Besphorns. Russia has no securates of safety for her may and commer class maxine. Russia, with 50,000,000 of people in Europe alone, can not be expected to be content with such insteament puritime privileges se are offered by Archangel on the White Sea and Cronstact on the Baitio, ports which are ice Medied for several months in the year. Able men among English statesmen candidly confess that Russin's ambition to capture Constanti mosts and control the Hack Sea and the Helicapost is quite as just and landable as that Eug-Estmen believe that the integrity of England's Indian empire can be best secured by allowing ve that the integrity of England's Russia to work her will and occupy Constanti mople; that once securing this realization of mople; that once securing this realization of what has been her political dream and darling ble interest in threatening the ank and rear of India. The Hungarian province of Transylvania is of the same blood with Roumania, but se provinces know that nothing keeps is from absorbing them all to-morrow es cept Austria-Hungary, supported by trermany and are of the same faith, they do not want to lose their independence or be made the military result of Russia's armies when she moves on Constantinople, so they are all disposed to sale Austria, hoping to thus preserve the and their independence as long as possible. As a matter of fact, the Ottoman yoke is ensier on their Christian and Jew subjects than the rule of Russia, so the Danubian and Ralkan princip alities, while glad to enjoy independence of

ENGLSS OF RELEASE.

For many years the surplus revenue of the national government has been gradually increming. Payment of so large a proportion of the public debt and reduction of the interest upon the remainder have diminished the yearly out lay on intereses account by about \$80.000,000 per sumum. In most departments of the gov ernment expenditures have been reduced during the last ten years. The only exception of im portance is the pension roll.

Under reduced expenditures the surplus,

steadily growing larger, has now reached a point where reduction of revenue is admitted to December In what manner this reduction is to be made is a question that challenges the at-tention of all parties. A special from Washing ton ears that within a twelve-month all the ide that can be called in prior to 1901 will bonds that can be called in prior to 1901 will have been redeemed hence the treasury, after another year, will not be usle to use any of its aurplus, however that surplus may be estimated, until it shall be possible to begin the redemption of bonds that will mature in 1904. This fact will confront the next congress, and it will force cansideration of the question how and upon what principles the revenue is to be reduced. The advocates of low tarif will propose to cut down the revenue by reducing the duties on in

down the revenue by reducing the duties on in ports; the advocates of protection will favor re ports; the advocates of protection will favor reduction and perhaps total repeal of internal taxes. But nearly all the revenue obtained by internal taxation is derived from liquars and to harco, and these are the very articles that ought. he be taxed as long as revenue is required in the taxed as long as revenue is required in the taxed taxed revenue to the best taxed revenue to the taxed the only augar-producing state, and stress of ces is likely to compel the protectio sircumstances is likely to compel the protection into to sacrifice the interest of a single state to mave the wider and larger interests of many, for the people never will consent to repeal the taxes an inquers and tolesco, and yet it is certain that the sixplus must be cut down. Repeal of the sugar entire would cut off above \$50 600,000 per unnum, and this reduction would go far the milier the protectionists of the trouble of a to relieve the protectionists of the trouble of a reducing the protections of the round of a reducing the results and the reducing the starm about it, but it became new that it is her partly of the cargo that must be thrown over-board to respect the remainder; the the New York Tribure intimates that it will be done with less

regret for the reason that Louisiana sanda h relid democratic delegation to the house of con-grees, and "the democratic party is the party of free trade." This puts the argument on about as high ground as could be expected from the solilabness of extreme protection

PROHIBITION FACTS

The special senate committee of the Verment legislature have reported a license bill which is substantially the law in force in Nebraska and other states. The committee, in their report have this to say of the present prohibition isw Public sentiment sufficient for the enforcement of the law exists in but few of our towns and viof the law exists in but lew of our towns and vil lages, and in nearly all of them the sale of liquor is practically tree and unrestricted. This experience is not confined to our state. From Maine's most earnest lemperance advocable comes the despairing cry that her prohibitory haw it a failure and from all states of long experience in temperance legislation where the semblance of prohibition now remains comes similar testimaly and many have abandoned prohibition which does not prohibit and adopt a strangent law to restrain and prohibit and adopted stringentlaws to restrain and regulate that which experience shows can not be completely destroyed

This bill will not pass at this session, but its freely sold and consumed in Vermont ever since the law was aparted, and the result of all at the lack of upanimity of public sentiment.15 and to make complaint against a liquor dealer"
Beginning with 1850, Massachusetts has had about twenty-five years of prohibition, and haif that number of years under the toesnes system Allowing for the increase of population. statistics show that there has been no more liquor sold under license than under prohibition The Massachusetts license law is really a compromise between license and prohibition. The local op-tion feature in it gives each town and city the right to prohibit the sale of liquor within its limits. At the last election in the twenty-three cities of the state the total license vote was of sites of the state the lotal liberes vote was of \$88, and the total non license vote \$1,0°5 An average increase of \$13 votes for no license would change the result from heene to no license in all cities except Boston, where the mojority for license was \$819. In twenty-slight of the sixty three towns that voted for license, rotes On the license question last year only 40 per cent of the legal voters of the state took pains to express their opinion either way, while

75 per cent, represents a full vote Where public sentiment favors prohibition it can secure it, and where it does not the license of liquor selling is permitted. For a dozen years the people have not elected a legislature Which favored a return to prohibition, and there dorse it and a large portion of the republican party holds that the present "local option" law is as stringent an enactment as can be concreded. And yet the probibition vote more than holds its own in nearly every state of the Union where they have a party organization. The work given for at John in 1884 has been more than doubled it is year. This is not a remarkable fact, for party lines are drawn with such strictness in presidential campaigns that a com-paratively small prohibition vote could be ex-pected, compared with years when the party pected, compared with years when the party stake is of less consequence. In Maine the pro-bibition gain over 1884 was 1703, New Hamp-shire 623, Vermont 50, Connecticut 2500, New York 10,000, New Jerrey 18,123, Pennsylvania 18 553, Ohio 16,588, Indiana 6000, Illinois 8000, Michigan 16,600, Minnesota 8316. Wisconain also shows a very large gain over its prohibition rote of 3500 in 1884, but we do not have the official figures. With the single exception of Massa-chusetts there has been an increase in every state over the vote cast for St. John. The curlparatively slight, while in the Middle states and the West the gains are very large. In thirteen Northeastern and Northwestern states the pr that this gain has come chiefly from the repub-

Not a few of the mugwump papers are made naheppy by the president's relustatement of the Misseuri distrat attorney. The New York Freing for the instance, notifies him that 'his reasons for this abilion will sensity cause him a deal of trouble," and thest it goes on to plunge the whole matter into that vagueness and uncertainty out of which all the abuses. and uncertainty out of which all the abuses shinno in fact we are just where we ware just June, and as if the term 'offensive partisanship' were again surrounded by the obscurity whi b for some time after his eleveland came into

office deprived it of a large part of its value?

The Chicago News, another mag wump paper, famous that "the president his allowed the rudder to stip, and his ship has swerred from the course he marked out for it himself." The same paper confreses its inability to reconcile the act of the president, in reselucing the sus pension of I with those instruct Attorney lien ton with his notification to efficient ideas of July 14 lest, or even with the reassum of his own letter cidering the rejustatement of the offend One of the most unfortunate of we memore of his not u, it is added, will be "the claim of the barnacles of the president part; that Ben on's rest renon is a significant recognition that politics, and not principle and an adherence to bledges, is to be the future chart of the administration?

More democratic than the pournals yest 100 ed is the chicago Times. That paper has been a strong supporter of the administration yet it says. The president s action reinstating the permicinus Missouri attorney can not be reconciled to his rule, nor to any rational construction of the terms of his letter to that permicio servant. It is evident, however, that the rein statement of that servant is not meant to be an acknowledgment that any error was committed in suspending him but that the sole motive of it is to avoid a quarrel with those incorrigib spoismen, the two senators from Missouri One of the evidences of this is the fact that the order of reinstatement does not include the Penn sy vania district attorney, Stone, who was suspended at the same time and for the like offense that caused the suspension of the Missour

The grounds of those criticisms have now ber enlarged by the president's positive refusal to reinstate Stone, and by his statement of rea-sons for the refusal. On this subject the presi-dent is trying to stand where he has left him-self no room. He has sawed off the limb be-tween himself and the tree

The vastness of the British Indian empire is carrously illustrated by the enermons records of mortality, which are taken quite as a matter of course by the sanitary commissioner's reports course by the sanitary commissioner's reports. Thus, as the *Times of India points out, in the report for Bengal during the last year, it is incidentally stated as a matter of no particular mean in that in Orissa alone no fewer than logical persons must have perished through the effects of a cyclone and storm wave without any record of their death being kept. The chowkidars, who should have reported the svent to the government, were swept away with the villages; no one was left to tell the tale. Again, cholora-rage of the \$1,000 tillagues enough \$125,767.deeths, while 1,042,042 persons died from fever. Altogether, 1,500,000 of deaths were registered in Hangal, exclusive of the 30,000 caused by the cyclone. On the other hand there were 1,000,000 buths to counterbalance the loss of population

The hitle principality of Bulgaria, by the firm, sympathy of all disinterested civilized nations The desire of Russia to absorb Buigaria has been manifest from the beginning of the pres-ent strife, and the absorption would have been accomplished ere this but for the restricting in finence of fear of other European powers Russia is ill prepared financially to face the ex-penses of a great war I rom motives of pru-dence she should abstain from war The danger seems to be in the well known ungovernable temper of the Romanoffs. If a republican would hold file under a democratic administration he must sink his party bass and be in active sympath; with the administration This is the substance and effect of his letter to Stone which breathes the spirit of genuine old fashioned democracy.

Of the Benton Stone business the Boston Ad perfuser says "By this upjust discrimination the president has emphasized his own partisanthip as a ruler in a manner too plain for a misunderstanding. He has expressly indicated that republicans in office are to be judged by one rule of fidelity and democrats by ano thing more demoralizing than this it is not easy

Now, while I admit your premises, that water transportation and San Francisco capital command at present a large portion of the trade of Puget sound, I believe that the resources of this region are such that at once a trade most remunerative to a rathroad running along its borders will be obtained.

First—The Gregon Railway & Navigation company require from four to five ithousand tons of each per mouth, and with its infunate connection with the Short. Line and the communities which they supply the demand oan safely, it seems to me, on the completion of the Portland-Scattle road, be put at three times that amount, or from twelve to lifteen hundred tons per month.

Second—The from ore to supply to all its varied manufactured forms the markets of Washington, damerice, is to be found and soon will be manufactured from a the markets of Washington, damerice, is to be found and soon will be manufactured in the Puget sound basin.

Third—The road rouning along the east side of Puget sound to the Canadian Facilic, besides the through traffic which it is sure to have as the connecting link between the railway systems of British Columbia and those of Washington, Organ and Canifornia, will cross five farming valleys which are from thirly to 100 miles in length and from three to ten miles in breadth. These valleys may be equaled for productive capacity in propertion to yellow the read of Puget sound (I not of the world). Here are millions of tons in sight seeking transportation in rough state to lide water, or in manufactured condition to a market.

What has been the experience of railroads on Puget sound ? The little coal road leading out of Scattle, costing not to exceed Silv.000, earned in October of last year enough to pay the interest for that month on the \$5,000 of bondied, and \$700,000 of focaling dothed to the Organ and road leading out of Scattle, costing not to exceed Silv.000, earned in October of last year enough to pay the interest for that mouth on the \$5,000 of bondied, and \$700,

of standard gauge, and most substantially constructed.

The timber on the line of the road from Seattle to the Canadian Pacific could not be exhausted in fitty years, and as it disappears farms and a farming population grow up in its place, equally valuable to a saliroad as factors in its assured prosperly and increasing traffic. The line to the Canadian Pacific would have no heavy grades or deep cut, and its cost, for this country, would be comparately small. A caroful and impartial study of the conditions here I believe will satisfy anyone that there exists to day no more premising field for railway construction than along the Puget sound hasin.

THE STAGE.

New Marker Theater.—Another crowded house greeted the McGibery family in their pleasing entertainment last evening, and testified by their frequent outbursis of genuine applauses a learly enjoy ment of the programme. The kinder-garten song of the lavenine members of the family enthed great amisement, and they received a tripple encore. The string quartette, lola, flegand Mrs. Frank's cornet due to the book Frank and Mrs. Frank's cornet due has the highly rectained when the warmly received, hiss aline's rectained ton, and Misses Forence and Grace in their little character sketch were very mixing the appropriate the property of the

THE H14 (OB QUESTION AT ATIANTA

The liquor question at Atlanta has broken out afresh. A dispatch from that oil; how 18 says. The liquor question is again to the front in Atlanta. The liquor question is again to the front in Atlanta. The liquo permits the sale of domestic wine. Since prohibition went into effect thirty six wine rooms have been licensed so that there is as much driking as ever. Twelvood these have been licensed within the last ten days, and not less than 100 will be in operation by thristmas. It is notarious that when is not the only liquid soil in these pinces of which the backeepens is save that one of the prohibitionists in the city. Hen the wine if d is a tile ofhentical compound which era, as the droker. The prohibitionists realize that they have a law which it is hard to enfore. I or the irst time in the history of the city notices are now posted up in large workshops threatening it edit larte of employes who drink in the building. It is has been brought about by the great crace of bottle dribbing. The prohibition six in w into all the active for each of the city council to pictor a prohibitory with there of \$15000, but the present cruncil is if were to such legislation.
